Response to Amendment/Election

Election/Restrictions

Applicant's election with traverse of Claims 12-19 in Paper No. 11 is acknowledged. The traversal is on the ground(s) that the new claim 1 now recites the step of "preparing and/or producing a connection between the element and the body". This is not found persuasive because the as in the previous office action the product as claimed can be used in another and materially different process such as to prepare or produce a connection. .

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-19 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hunter et al.(U.S.Pat.6,381,485). Hunter discloses a registration of human anatomy integrated for electromagnetic localization that shows all the features of the claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Melkent et al., and Hunter '038 are cited to show structure and method similar to the claimed invention.
